

# 2015 GOGARBURN INNOVATION CHALLENGE AWARD

In August 2015, COOLNOMIX was honored as a winner in the Royal Bank of Scotland's Gogarburn Innovation Challenge. This competition sought groundbreaking solutions to enhance energy efficiency and sustainability. COOLNOMIX's innovative technology, which optimizes air conditioning and refrigeration systems to achieve significant energy savings, stood out among the entries. A trial conducted at the Royal Bank of Scotland's West Edinburgh campus demonstrated a 25% reduction in energy consumption, equating to an annual savings of 13,140 kWh on a 27.6-ton capacity system. These compelling results underscored COOLNOMIX's effectiveness in energy optimization, leading to its recognition in the competition.
